

Adarsh Patel B

Software Engineer (Backend-Oriented)

adarshaldkar@gmail.com — +91 7010664806 — Puducherry, India
[LinkedIn](#) — [GitHub](#) — [Portfolio](#)

SUMMARY

Backend-focused developer with hands-on experience building **real-time data pipelines**, **distributed systems**, and **scalable backend services** using **Python**, **Node.js**, **Docker**, and **MQTT**. Designed **REST APIs**, processed **streaming data**, and deployed **containerized backend services** with a strong foundation in **system design and backend architecture**. Seeking **Backend / SDE roles** to build reliable and scalable systems.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6)
Web & Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, PostgreSQL, InfluxDB
DevOps & Cloud: Git, Docker, GitHub Actions, AWS(Basics)
Messaging & Systems: MQTT, Async Processing
Tools & Systems: Linux, Grafana, Postman

EXPERIENCE

Planarc — Backend / Full Stack Intern

July 2025 – Present

- Worked with **backend APIs** to improve data flow between frontend and server.
- Refactored **backend** modules to enhance **performance** and maintainability.
- Collaborated with **frontend** and **backend** teams to improve system **scalability** and reliability.

PROJECTS

NoiseSense — Distributed Real-Time Noise Monitoring Platform

[Github](#)

- Built a **real-time noise monitoring system** using **MQTT** and **microservices architecture**.
- Designed **backend services** to process **streaming sensor data** and store **time-series metrics** in **InfluxDB**.
- **Containerized services** using **Docker** to ensure **consistent deployment across environments**.
- Implemented **asynchronous message processing** to handle **high-frequency data streams**.
- Visualized **real-time data** using **Grafana dashboards**.

EduPulse — Full-Stack Student Feedback & Analytics Platform

[Live](#) — [GitHub](#)

- Developed a **role-based backend system** with JWT authentication and RBAC.
- Designed **scalable REST APIs** using Node.js and Express for analytics and dashboards.
- Designed **optimized database schema** for multi-user feedback analytics.
- Deployed **backend services** on cloud platforms.

COMPUTER SCIENCE FUNDAMENTALS

Operating Systems, Computer Networks, DBMS, Object-Oriented Programming

EDUCATION

Manakula Vinayagar Institute of Technology

2022 – 2026

B.Tech in Electronics and Communication Engineering

CGPA: 8.2

ACHIEVEMENTS

- **Finalist, Odoo Hackathon 2025** — Top 78 out of 19,000+ participants.
- **Ranked 24th, Unisys Hackathon 2025** — Out of 8,000+ projects.
